

Notice of Construction Activity
June 5, 2023 – June 11, 2023

Please see below for construction activities happening on the site of the Learning Resources Center, **June 5– June 11.**

1. Grading to continue on site
2. Mobilizing of equipment for shoring installation
3. Continued installation of shoring wall which will include drilling holes, pouring concrete, installing steel

Noise you will expect to hear onsite:

1. Large equipment such as drills
2. Idling trucks
3. Back up alerts

Vibrations may occur with the drilling. There is also the potential for increased noise if they hit a certain type of rock/soil while drilling. The contractor is doing their best to mitigate this impact by pushing the start of the loudest work to later in the morning as opposed to 7am which is what is stated as compliant with the Marin county noise ordinance.

If you have any questions, please reach out to Klaus Christiansen directly.
